Profile summary

Aspiring Software Engineer and computer science student with hands-on experience building production-ready systems and data-driven software. Strong fundamentals in backend development, data processing, and system design, with experience owning end-to-end projects and collaborating through code reviews.

Education

Bachelor of Technology in Computer Science and Engineering Chandigarh Group of Colleges, Jhanjeri CGPA: 6.2	2023 - 2027
Senior Secondary School Education Govt. Public High School, Pandoh Percentage: 62%	2023
Secondary School Education Adarsh Public High School, Pandoh Percentage: 85%	2021

Projects

Smart Travel Application [↗](#)

- Smart Travel Application built using Flutter
- Cross-platform mobile app for smart trip planning
- Implemented route optimization and live location tracking
- Budget estimation and itinerary management features
- Integrated Google Maps and travel recommendation APIs
- Responsive and user-friendly UI design
- **Tech Stack:** Flutter, Dart, Firebase, REST APIs, Google Maps API, Geolocation Services

Cryptocurrency Analyzer [↗](#)

- Cryptocurrency Analyzer Website for real-time market tracking.
- Integrated APIs to fetch live cryptocurrency prices.
- Interactive dashboards to visualize trends and price fluctuations.
- Portfolio tracking and performance analysis features.
- Responsive and dynamic web interface for seamless user experience.
- **Tech Stack:** HTML, CSS, JavaScript, Python, Flask, REST APIs, Chart.js, SQLite/MySQL

Netflix Clone [↗](#)

- Netflix Clone developed as a responsive front-end web application.
- Implemented dynamic navigation and search functionality.
- Designed interactive UI components similar to Netflix interface.
- Structured architecture to support future backend and recommendation system integration.
- Ensured responsive design across different screen sizes.
- **Tech Stack:** HTML, CSS, JavaScript

Mental Health Care Web Application [↗](#)

- Mental Health Care Web Application developed as a fully interactive and responsive platform.
- Implemented dynamic mood tracking and real-time DOM manipulation to enhance user engagement.
- Integrated smooth animations, hover effects, and scroll-based transitions for improved user experience.
- Applied form validation and interactive input handling for structured user interaction.
- Designed clean and accessible UI architecture optimized for performance across devices.
- **Tech Stack:** HTML, CSS, JavaScript

Skills

- **Programming Languages:** C++, Python, Java,, SQL
- **Frontend:** React,js, HTML5, CSS3
- **Backend & Databases:** Firebase, MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
- **Soft-Skills:** Problem Solving Approach, Analytical Thinking, Clear Communication, Teamwork, Adaptability, Time Management, Ownership Mindset, Fast Learning

Certifications

- **Robotics And Automation** – Codec TEchnologies [↗](#)
- **Problem Solving Certification** – HackerRank [↗](#)
- **My Equation** - Internship [↗](#)
