Profile Summary

Final-year Computer Science and Engineering student (Class of 2027) with strong software development fundamentals in Python, SQL, Java, and JavaScript, and hands-on experience building and testing full-stack applications integrated with REST APIs. Skilled in data structures, algorithms, and object-oriented programming, with practical exposure to version control (Git/GitHub), automated testing, and structured debugging. Passionate about continuous learning and examining how systems work internally, with proven analytical thinking, problem-solving, and cross-functional collaboration in Agile teams. Experienced in data validation, reconciliation, and quality assurance processes, with a curious, detail-oriented approach to building reliable, well-documented software.

Education

Bachelor of Technology in Computer Science and Engineering
Chandigarh Group of Colleges, Jhanjeri CGPA: **9.43**

2023 – 2027

Experience

Software Engineering Intern — Josh Technology Group, Gurugaon [May/2026–July/2026]

- Performed data validation, reconciliation, and quality checks across test datasets using Python and SQL, ensuring consistent, traceable, and audit-ready documentation across releases
- Designed and implemented test cases and use cases, and built automated regression test suites to support structured, methodical, and well-documented software development processes
- Collaborated with cross-functional engineering stakeholders using Git for version control to identify defects early, maintain data accuracy, and drive continuous improvement through analytics-driven review

Projects

Cryptocurrency Analyzer — [GitHub](#) 📄

- Developed a full-stack financial data analytics application in Python (Flask) with JavaScript/HTML/CSS, following sprint-based Agile planning and Git/GitHub version control
- Integrated multiple REST APIs to fetch, clean, validate, reconcile, and transform live market data in JSON format; implemented automated unit tests to catch defects early and improve reliability
- Designed and optimized SQL queries (joins, indexing) on MySQL/SQLite; built responsive Chart.js dashboards for market and competitor analysis, reducing average query/API response time by 35%
- **Tech Stack:** Python, Flask, SQL, MySQL, SQLite, JavaScript, REST APIs, JSON, HTTP, Git, GitHub

Waste AI Classification System — [GitHub](#) 📄

- Researched and benchmarked 4 model architectures in Python using quantitative evaluation metrics, selecting the best-performing model (91% accuracy across 12 categories)
- Implemented validation/unit tests for model reliability and deployed as a web service, applying structured debugging, data validation, and Git-based version control
- **Tech Stack:** Python, TensorFlow/Keras, Streamlit, Git, GitHub

Skills

- **Programming Languages:** Python, Java (OOP, DSA), JavaScript, C++
- **Software Development:** REST API Design & Integration, JSON, HTTP, Software Development Life Cycle (SDLC), Agile/Scrum, Automation, Automated Testing
- **Version Control & Collaboration:** Git, GitHub, Code Reviews, Team Collaboration, Cross-Functional Communication
- **Databases:** SQL, MySQL, SQLite, MongoDB, Firebase Realtime Database, Query Optimization & Indexing
- **Data & BI Tools:** MS Excel, Power BI (working knowledge), Chart.js Dashboards/MIS Reporting
- **Core CS Concepts:** Data Structures & Algorithms (400+ LeetCode), Object-Oriented Programming, DBMS, Complexity Analysis, Problem Solving, Analytical Thinking
- **Soft Skills:** Curiosity, Continuous Learning, Innovation, Attention to Detail, Structured Problem-Solving, Communication, Learning Agility

Achievements & Leadership

- **District Topper** in a National-Level Examination
- **Top 700 participant across 11 countries** in the Ericsson Edge Academia Program
- Campus Executive, **E-Cell IIT Bombay** — led cross-functional teams to organize technical events and workshops
- Member, **Training Advisory Council (TAC)** — collaborated with faculty and student teams on curriculum initiatives
- Maintained **400+ DSA Problems** solved with active contribution streak on LeetCode and GitHub

Certifications

- **Introduction to MySQL** – Infosys [View Certificate](#) 📄
- **Building AI-Powered Search with MongoDB Vector Search** – MongoDB [View Certificate](#) 📄
- **Search with MongoDB** – MongoDB Community [View Certificate](#) 📄
- **LLMs on Google Cloud: Retrieval-Augmented Generation on Vertex AI** – Infosys [View Certificate](#) 📄
- **Professional Skills** – IBM [View Certificate](#) 📄
- **Introduction to Modern AI** – Cisco [View Badge](#) 📄
- **Introduction to Generative AI** – AWS [View Badge](#) 📄
